

SafePay

An Automated Checkout Device for Cash Payments

SafePay provides retailers a reliable and adaptable solution that secures and automates cash payments at multiple points within a store. With its small footprint and modular design, SafePay fits under the counter and integrates into a self-checkout terminal or a cashier-facing payment terminal. The rich design and feature set provides unparalleled use case flexibility – enabling retailers to automate cash payments for optimal employee and customer experience.

Closed Loop Cash Management

SafePay cash deposits can be collected into a secure cassette or into a thermally sealed plastic bag – preventing access to cash at any time, thus enabling an effective closed loop cash management process

Multiple Deployment Scenarios

SafePay has been designed to fit under a counter, enabling it to easily integrate as a self-checkout solution, assisted self-checkout solution, or cashier-facing payment terminal

System Reporting and Monitoring

SafePay offers the intelligence required to be a component of a comprehensive cash management dashboard, point-of-sale system, or remote service monitoring tool

Streamlined System Maintenance

SafePay has been architected in such a way to enable plug and play replacement of key components as well as remote problem resolution via its software platform

Self-Checkout

Assisted Self-Checkout

Cashier Facing Terminal

Specifications
